Not sure how to bid – click the “How to Bid” under the Help menu selection.

### **Bidder Registration Instructions**

You can browse around all you like but you *can't bid* until you register. It doesn't cost anything to register and you're not committing to pay for anything unless you bid on an item. Even then, you won't be invoiced unless you actually *win* a bid.

From the **auctionUSOPEN.com** web page, click the button “Registered? Bid Here!” to go to the actual auction site – or click on an item in the scrolling item list.

From the USOPEN Auction Home Page, click “Register” in the Register Today box or on the lower menu bar. Click the appropriate button for either US Registration or International Registration. **\*\* You must be 18 to register \*\***

Fill in all of your registration information, including your email address – pick a password and ***record the password*** for future use. You will need to enter this password to log in and *each time you bid*. DO NOT give anyone your password. Finally, click the review button, then update your user profile. At that time, you will have been emailed your assigned ***user name***.

After getting an email with your system assigned ***user name***, you can log into the auction site and change the user name to something more familiar and easy to remember – ***record your new user name and keep it safe***. You will use this ***user name*** and ***password*** to log into the auction site and bid on the items.

Remember, you can browse any of the items without logging in but you ***MUST register and log in order to bid!***

**Please bid often and high – *it's ALL for the kids !!***
